

Case Study City: *Granada*

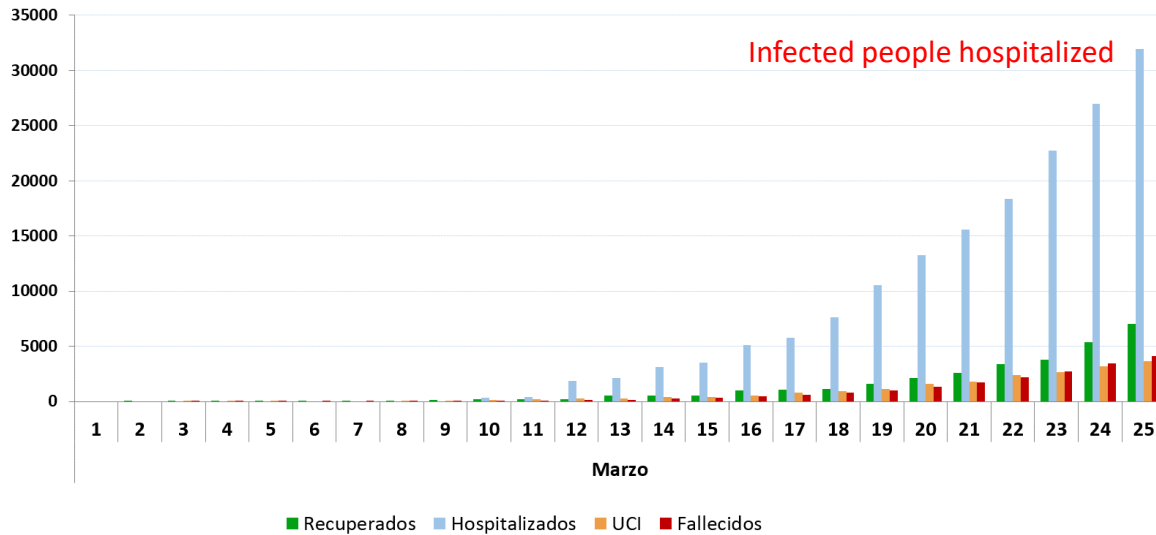

Part 1 - General Description

- Granada, in the south of Spain, is one of the eight provinces of Andalusia. With 924,550 inhabitants, Granada province is the fourth most populated in Andalusia. It has 170 municipalities and about 30% of the population lives in the capital. It is a city of touristic services, with a Health Hub (Health Technologic Park), an important ICT Cluster and a well known University.
- Please mention a few bullet points on the effects of the current Covid19 crisis in your city (figures, pictures if possible)
 - Actually we are still waiting for the peak of new infected people
 - One in five Andalusian infected with coronavirus is sanitary (same apply for Granada)
 - Deceased: 39 people

Part 3 – Challenges, lessons learnt & recommendations

- First, the most important: Stop the peak, to flat the curve of the disease
- Improve the Public Health System with more resources (financial and human)
- Foster the international cooperation to defeat future risks, in special with new centers and countries. Disseminates information and researches is crucial for future threats.
- Stablish new public-private links in order to have a more efficient infrastructure
- Foster city to city cooperation with new clustering projects
